Teva Canada announces product availability of AJOVY™

**AJOVY™ is the first and only anti-CGRP treatment
with both quarterly and monthly dosing for the preventive treatment of migraine in adults**

- AJOVY™ is supported by the AJOVY™ Teva Support Solutions® (AJOVY TSS) Patient Support Program, whose services include reimbursement navigation, bridging/copay coverage, and injection training.
- AJOVY™ has been studied in patients with chronic or episodic migraine and was shown to significantly reduce patients' mean monthly migraine days—with some patients achieving a 50% reduction or more.¹⁻³

Montréal, Québec (August 19, 2020) – Teva Canada, a subsidiary of Teva Pharmaceutical Industries Ltd., today announced product availability of AJOVY™ (fremanezumab) 225 mg solution for subcutaneous injection for the preventive treatment of migraine in adults who have at least four migraine days per month. AJOVY™ is the first and only anti-CGRP drug approved in Canada, the European Union, and the United States that offers quarterly or monthly dosing regimens for the preventive treatment of migraine. The quarterly dose of 675 mg is given as three 225 mg subcutaneous injections once every three months; the monthly dose of 225 mg is given as one subcutaneous injection once each month. AJOVY™ is currently available in a latex-free prefilled syringe.¹⁻³

“Canadian patients and prescribers have been waiting for a product like AJOVY™ that offers flexible dosing options convenient for their busy lifestyles,” says Christine Poulin, General Manager of Teva Canada. “With the product now in distribution across Canada, Teva Canada is also introducing a comprehensive patient support program to educate patients and provide financial support to meet the various needs of Canadians who suffer with the condition.”

Migraine is a disabling chronic neurological disease that causes head pain so severe that sufferers often cannot function during an attack. Migraine reduces quality of life and disrupts migraineurs' ability to perform daily activities.^{4,5} It is among the top 10 causes of disability worldwide and the seventh cause of years of life lost to disability.⁶⁻⁸ In Canada, migraine is most common in women and most common between the ages of 30 and 49.⁹

Dr. Elizabeth Leroux, president of the Canadian Headache Society and founder of the websites Migraine Quebec and Migraine Canada, says the availability of AJOVY™ is good news for all migraine patients and treaters. “The unique dosing options that AJOVY™ offers will provide added flexibility and stability for many patients to manage their symptoms with less disruption to their lives and routines. This is a welcome next step in migraine management.”

AJOVY™ was evaluated in two pivotal Phase III clinical trials that enrolled patients with disabling migraine and studied fremanezumab as a prophylactic treatment. In these trials, efficacy assessments included the change from baseline in the number of average monthly migraine or headache days and the proportion of patients achieving at least a 50% reduction in affected days. The safety profile was also assessed in these trials.¹⁻³

About the AJOVY™ Teva Support Solutions® (AJOVY TSS) Patient Support Program

AJOVY™ patients and prescribers are supported by the AJOVY™ Teva Support Solutions® Patient Support Program, which was developed in collaboration with Canadian migraine experts and offers services such as injection training, insurance/coverage investigation, and paperwork assistance.

About AJOVY™

AJOVY™ (fremanezumab) is indicated for the preventive treatment of migraine in adults who have at least four migraine days per month. AJOVY™ is available as a 225 mg/1.5 mL single-dose injection in a prefilled syringe with two dosing options: 225 mg monthly, administered as one subcutaneous injection; or 675 mg every three months (quarterly), administered as three subcutaneous injections. AJOVY™ is intended for patient self-administration after the patient or their caretaker has been trained to administer the product.

Helping improve the lives of Canadians

At Teva, we are committed to providing innovative and quality medicines to the nearly 200 million people we serve around the world every day. From our role as a global leader in generic and brand name medicines to the innovative solutions we create for our healthcare partners, we offer a unique perspective on health—here in Canada and around the world.

About Teva Canada
